

For Immediate Release

**Oversight Systems to Announce Innovations in Mobility and
In Support of SAP HANA® at SAPHIRE® NOW**
Focus is on “big data” techniques for business analysis and mobility

ATLANTA – May 7, 2012 – Oversight Systems, providers of Continuous Analysis (CA) solutions that turn financial transactions into plain-language actionable insights, announced it will introduce new solutions at the SAPHIRE® NOW and ASUG Annual Conference. The solutions include predictive analytics capabilities in support of the SAP HANA® platform and a new mobile application. Oversight will exhibit in booth 211 at the conference, being held May 14-16 in Orlando, Fla. The company will also showcase its products at the high tech industry business unit demo pod.

The company’s Oversight CTM (Continuous Transaction Monitoring) software is an SAP-endorsed business solution. Oversight is also teaming with SAP on co-innovation related to SAP HANA. At SAPHIRE NOW, Oversight will demonstrate how Oversight CTM uses powerful Continuous Analysis technology to complement SAP HANA and deliver the following benefits:

- Instant analytical insight into unexpected financial transactions, no matter how massive the data load
- Sophisticated real-time, plain-language guidance into finding hidden business opportunities and correcting underperforming operational processes
- Complex predictive business analysis that enable pre-emptive actions across the enterprise
- Fast, accurate analyses of future business risk

As part of Oversight’s ongoing commitment to help customers embrace and extend the value of their investments in SAP® solutions, the company will also demonstrate its new mobile solution. Initially available for the Apple iPad, this application automatically delivers real-time, actionable insights to on-the-go executives and staff.

“We’ve been using “big data” techniques to help organizations discover new ways to operate more efficiently and enhance their bottom line since 2003,” said Patrick Taylor, CEO of Oversight Systems. “SAP HANA and the maturity of mobile platforms are a really exciting combination for our customers. The time is now for better, faster, smarter decisions, with software delivering real-time insights rather than forcing managers to learn analytics or wade through yet another layer of reports. By working with SAP, we’re helping to bring this vision to market.”

Please contact Oversight at info@oversightsystems.com or 770-984-4600 for more information or to arrange a private meeting during the SAPHIRE® NOW event.

About Oversight Systems

Oversight Systems delivers Continuous Analysis (CA) solutions for “big data”. These packaged analytics applications deliver continuous visibility into financial and operational transactions. Plain-language insights show not just what happened, but why – and what to do about it. The

company's Oversight CTM software is an SAP-endorsed business solution that drives smarter, faster decisions across the organization, contributing directly to the bottom line. Founded in 2003 and privately held, Oversight Systems is headquartered in Atlanta.
